

Silo for Safe Access

Put IT Back in Control of the Web

Silo for Safe Access (Silo Cloud Browser) is a web browsing solution that enables access to untrusted web content — from anywhere, on any device — without introducing risk to your corporate infrastructure.

Silo for Safe Access is built on Authentic8’s patented, cloud-based Silo Web Isolation Platform, which executes all web code in a secure, isolated environment that is managed by policy, providing protection and oversight of all web-based activity. Embed security, identity and data policies directly into the browser, giving IT complete control over how the web is used by internal users, and how web apps may be used by external users.

The world’s most at-risk enterprises and government agencies rely on Silo for Safe Access to protect local devices and corporate infrastructure from web-borne threats:

- **Sandbox unknown URLs:** Open any URL (from email, support tickets, chat, etc.) without putting your local devices at risk of infection
- **Segregate personal browsing:** Allow employees to conduct personal browsing (“morale browsing”) without risking your corporate infrastructure
- **Isolate workspace on unmanaged devices:** Enable remote employees and contract workers on unmanaged devices to access corporate web apps in a secure, policy-controlled manner without requiring VPN or CASB

Features and Benefits

| Features | Benefits |
|--------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------|
| Full Isolation: All web code is executed on Silo servers, not end-user devices | Potentially unsafe content never touches an organizations' assets |
| Any Location, Any Device: Run on any modern browser | No need for software installation on endpoints |
| Granular Policy Controls: Define policies at user or user group level and enforce them on any device and location | Tailor policy to your organization / sub-organization's needs and ensure consistent application |
| Straightforward Integration: Integrates with existing firewalls or secure web gateway or proxies | Build on your existing infrastructure and investments |
| Non-repudiable Logs: Encrypted audit logs of all web activity are captured in one place and easily exported | Simplify compliance and audit, and enhance security analysis |
| Cloud-based: Turn-key, cloud-hosted solution that elastically scales to an organization's needs | Seamless to deploy and no ongoing management required |

Use the Silo Web Isolation Platform to maintain data security, and respect the privacy of your users. Our compliance:

PROTECT THE THINGS YOU CARE ABOUT FROM THE THINGS YOU CANNOT TRUST

Authentic8 enables anyone, anywhere, on any device to experience the web without risk. The Silo Web Isolation Platform by Authentic8 separates the things you care about like apps, data and devices, from the things you cannot trust like public websites, external users and unmanaged devices. Silo executes all web code in a secure, isolated environment that is managed by policy, to provide protection and oversight.

Today, the world's most at-risk organizations rely on Silo to deliver trust where it otherwise cannot be guaranteed.
